Conferences' attendees live tracking and analysis, IBM

- > In less than a month, our team built a proof of concept of a solution to the registration of attendees in conferences, while also providing mobile applications and an RFID tracking system used to identify the attendees' participation in the venue.
- > Used the captured data to gain insights and create a dashboard using the Watson Analytics platform.
- > Created reports by cleaning and processing the raw data using Pandas and Matplotlib.
- > A fully-working demo was presented to IBM's global leadership during the *Interconnect* conference in Las Vegas.
